

THINGS WE NEED TO KNOW WHEN YOU CUSTOMIZE:

- 1) Locations of the customizing.
- 2) Details of the customizing such as color, size, style, font, etc..
- 3) Any personalized embroidery of team items **MUST** be accompanied by a clear **TYPED** list of names that corresponds to the particular garments being customized. The list you furnish us with is the list that will be used by the printer or embroiderer. Walters' Swim Supplies will **NOT** retype nor process orders when a team does not furnish such a list.
- 4) Customizing only lasts as well as it's maintained. Pool chemicals and care of the garment will affect the lasting ability of the customizing!
- 5) **Christmas customizing orders MUST be placed before Thanksgiving in order to have any chance at a Christmas delivery.**
- 6) If we receive camera ready art which only needs sizing, there will be no art charge. If we need to correct files, create images or search for images, there will be a \$50.00 per hour charge.
- 7) **Artwork** - vector based art is art that is originally created in a vector based program such as Adobe Illustrator (AI format) or CoralDraw. Many times AI files are often converted to EPS format or PDF format to make them more compatible for most users. These file formats are acceptable as long as they retain the original vector based capabilities. CorelDraw files can be converted to AI files. **All fonts must be converted to paths/outlines before sending.**
