SwiMP3 v.2 - Waterproof MP3 Music Player

Make your swim rock! The SwiMP3 is perfect for anyone involved in water activities. Unlike other waterproof MP3 players, the SwiMP3 uses bone conduction - the direct transfer of sound vibrations from your cheekbone to the inner ear. This technology provides the swimmer with exceptional sound clarity. SwiMP3 is fully waterproof and can be used with any goggle. The unit holds about 60 songs.
