SWIM-LIFT® Series GALLATIN

The Gallatin is the most versatile ADA compliant Swim-Lift® of the assisted access devices. This fully self-operated device is the first of its kind to accommodate both in-ground pools and spas without unnecessary customization. The Gallatin requires no more than 12-inches of total depth (deck to floor/bench) for proper installation and the standard unit will accommodate anchor locations of 20 1/2 to 30-inches from the pool wall thanks to its adjustable base stand.

The Gallatin is not only the most versatile lift in the aquatic industry, it's also the most proven. Supported by certified load and seismic calculations, the Gallatin is designed to lift a 400-pound load with only 55 psi of water pressure. That, combined with the Gallatin's patented pressure foot support structure and dual deck attachments, give it the strength and the stability that have made it the standard to which all others are compared. Don't accept cheap imitations; demand the very best and the proof that supports it!

Anchor assembly and accessories sold separately.
Field measurements required.

FEATURES:

- 4 1/2 inch stainless steel cylinder lifts 400 lbs. at 55 psi.
- Strongest lift system available
- ADA-ABA* compliant
- Operating lever adjacent to seat in all positions
- Seat rotates a full 180° while edge of seat is at least 25-inches inside of deck edge
- Dual anchor points with transport wheels are standard
- Pull-out leg rest
- Patented pressure foot
- Flip-up outer arm and seat belt provides extra safety

Swim-Lift® Gallatin 27336	\$6074.95
<i>Five year warranty. Weight: 210 lbs.</i>

Gallatin Preset Anchor 27450	\$399.95
Gallatin Retro-Fit Anchor 27400	\$389.95
Booster Pump Kit 27028	\$1651.95

SWIM-LIFT® Series LOLO

The Lolo is the industry's most affordable water powered ADA compliant Swim-Lift®. The Lolo not only complies with the ADA laws, but it also is in compliance with U.S. Access Board Guidelines written specifically to cover recreation facilities*. The Lolo incorporates many of the strength, operation and performance proven features that are associated with Spectrum's costly lifts. The recreation facility patron who may experience difficulty entering or exiting a swimming pool is extended autonomy if a Lolo lift is employed.

FEATURES:

- 300-pound (136 kg) operating load capacity, with a 1.5-safety factor
- ADA compliant
- Water powered operation, only 55 psi (0.38 Pa) to lift 300-pounds (136 kg)
- Dual lift operating controls – allowing operation from the deck and pool
- Stainless steel construction
- Patented pressure foot for stability
- Dual anchor points for stability
- Multi-function armrest
- Self-adjusting footrest
- Wide fold down molded seat
- No electric power hazard
- No batteries to lose charge and/or that require replacement
- No pinch points

The Lolo is designed to accommodate in-ground pools having minimum deck to pool bottom dimension of 42-inches (typically 36-inch water depth). Standard units will accommodate various anchor locations from the pool wall thanks to its adjustable base stand. Anchor assembly and accessories are sold separately. Field measurements may be required.

SWIM-LIFT® Series TRAVELER

The Traveler™ is the industry's most affordable electrically operated Swim-Lift®. The Traveler® complies with the ADA and ABA* regulations and current laws that are written specifically to cover recreation facilities. The Traveler™ incorporates the same strength, operation and performance proven features that are associated with the industry's most popular lifts – the Gallatin, Pintlar, Lolo and Elkhorn, all of which are part of Spectrum's Swim-Lift family.

Recreation facility patrons who may experience difficulty entering or exiting a swimming pool or spa are extended autonomy when a Traveler life is provided.

The Traveler™ is designed to accommodate in-ground swimming pools and spas. Anchor is sold separately. Field measurements may be required.

FEATURES:

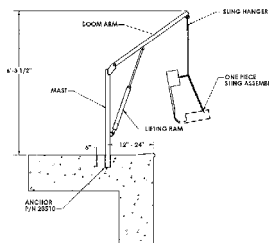

- Certified 400-pound (181.44 -kg) operating load capacity, with a 1.5-safety factor
- ADA-ABA* compliant
- 24-VDC operating system with rechargeable battery and charger
- Three convenient handset control points – ergonomically designed for either left or right handed individuals – allowing for operation of lift from pool deck, water and seat
- Stainless steel superstructure, no paint to chip, no dissimilar metals to corrode, all metallic components are electro-polished and passivated, ensuring the ultimate in corrosion resistance
- Overhead transfer assist system
- Single anchor point - allows for ease of installation and removal
- Multi-function armrest
- Self-adjusting footrest
- Comfortable fold down molded seat
- Wide web seat belt with non-metallic cam lock buckle
- Stainless steel life transport cart is available
- Five-year limited warranty

SWIM-LIFT® Series ELKHORN

The Industries Strongest Economical Lift

The Elkhorn is the strongest economical assisted access lift available in the market place today. It is fabricated of heavy-wall stainless steel and is designed to support 400 pounds with a 1.5 safety factor.

FEATURES:

- 400 lb rated load with a 1.5 safety factor
- Certified, stamped engineering drawings and calculations supporting strength and seismic loading
- One-piece mesh sling assembly, dries quickly and is adjustable
- Stainless steel chain and spreader bar
- Exclusive dual passivation process ensures maximum corrosion resistance
- Unit is designed to accommodate both in-ground and above ground (up to 31" wall height) applications
- 12"-24" setback range allows for use with large gutters and coping stones
- Portable and lightweight - 55 lbs shipping weight
- Unit requires no electrical connections
- Easy to install, even on existing facilities
- Optional adapter allows Elkhorn to be installed in existing anchors
- Two-year warranty
