PAL Portable Lift

The PAL Portable Aquatic Lift™ requires no installation and rolls to any poolside location. The PAL is powered by a 24-volt rechargeable battery. Its replacement battery provides a full day's use and is quickly recharged using the accompanying charging unit. The PAL is easy to use. Its operations are performed at the push of a button. The controls are waterproof, so they can be immersed for operator convenience.

The PAL is virtually trouble free. Its 300 lb. lifting capacity will accommodate almost any user. The PAL is an easy solution in meeting ADA goals to provide universal access for public swimming facilities.

UNDERWATER PLATFORMS

The Underwater Platform provides the instructor with a portable and durable platform 60" x 40" and is designed to be free standing with variable and adjustable height. PVC guard rails can be assembled and installed for further student stability and security. The rails are locked in an "L" arrangement that provides confidence but with easy, non-impaired access to the swimming area outside the Underwater Platform.

Your students will push-off sooner and with less coaxing and make those first independent swimming motions without the fear and trepidation that is sometimes companion to hanging on to a gutter and pushing off a vertical wall. It's easier "to let go" on a Underwater Platform. The Underwater Platform is available in three heights. The units are shipped UPS. **All you supply is the sand.**
